JW SPORT

Since its birth in 2013, JW has been constantly pursuing innovation and excellence. With an extraordinary modern vision, it reinterprets the evolution and transformation of fitness equipment. Focusing on enhancing customer excellence, it elaborates on the definition of high-end fitness equipment and consolidates the classic brand status of JW fitness equipment. While pursuing excellence, JW also represents the attention and level of the current equipment manufacturing industry to details and quality, and continuously presents romantic, modern and passionate aesthetic concepts to users.

In nearly eight years, JW has successfully laid out in major cities in China and achieved great success in the Chinese fitness market. In high-end commercial fitness clubs, star-rated hotels and enterprises and institutions in mainstream cities, JW always provides customers with a higher value service system and better fitness equipment from the perspective of the essential needs of the market. The innovative and subversive design concept has gained extremely high recognition in the Asian fitness circle. It has led the trend in the field of high-end commercial fitness equipment. JW has always been committed to being a leader of international first-tier brands. It is determined to create a fitness equipment brand that can best meet essential needs.

JW SPORT TOWN

At JW SPORT TOWN, everyone here is creative, innovative, and motivated. This is the exact place where we make JW happen. We would love to have you at JW SPORT TOWN. The moment you land, you will be amazed by how we build the finest fitness equipment, and there is no doubt you will love this place.

OUR PRODUCT

We carry all kinds of fitness equipment, covering aerobic equipment, strength machines and free weight benches etc. With elements of high standard, safety and innovation, we create many unique and popular products. This is how we take JW spirit into practice and make difference.

YS-880T

ARTHUR Commercial Treadmill

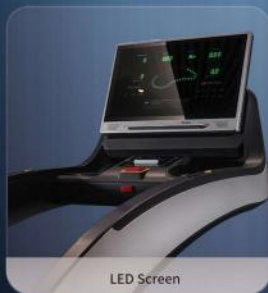

Elegant look with boundless, fully wrapped inverted handrails. Integrating excellent biomechanical Design allowing fitness centers and users to enjoy the benefits, while being in accordance with fashion design philosophy.

JW SPORT, A Strong Companion for Your Success.

Touch Screen

LED Screen

Excellent Performance. Extraordinary

4.0 HP Powerful Motor.
High-powered driving system uncovers more physical potential.
Achieve breakthroughs easily, steadily and vigorously.

Stunning Appearance Vibrant

fully wrapped handrail design.
Integrate dynamic usability and nobility. Demonstrates sensual beauty

Exquisite Craft Ingenuity

Molds designed by inventive European partners
Detailed finishing with rigorousness and neatness
Quality demonstrated through small details

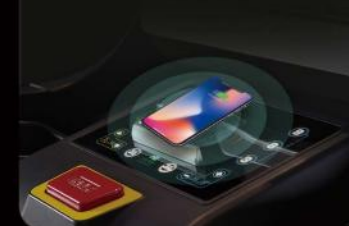

Lift/Lower Screen with One Single Tap

Quality demonstrated through small details

Wireless Recharging for Mobile Phones

Always full of energy

Humanized Design Safe Fitness

4.0T thickened Siegling Belt
Stronger kinetic feedback and damping effect
Greatly reduce impact and sport injury

Features

Display Type: 27" screen
Uprights: fully wrapped with plastic;
steel frames
Running Belt: 4.0mm thickness;
Working temperature: -10~70°C
Running Board: Highest strength;
25mm thickness;
static load capacity: 600KG/1323lbs.
Elevator motor: Voltage:200-240V;
Output power:60W

Running Belt: 580 mm (Width)22.8in
Main Motor: Rated power: 4.0HP (3.0KW)
Power Source: External power supply;
AC 220V±10% (50Hz/60Hz)
Power Cord:16A AC 250V
Overload Protector: 13A
Static capacity: 150KG/330lbs

Unit Weight (LED console):
290kg/639lbs
Unit Weight (TFT console):
300kg/661lbs
Dimensions: (L*W*H)
2150*970*1850mm/84.6*38.2*72.8in
Running Surface:
580*1470 mm/22.8*57.9in

S-800

Commercial Treadmill

Sleek and elegant in appearance, with a powerful and restrained overall design, the high-tech design concept exudes a sense of nobility and uniqueness, while ensuring stability and safety during sports.

Touch Screen

LED Screen

The user manual

23.6-inch LED screen interface, multi-window display 32-inch touchscreen TFT monitor. TFT features a new year GAP capacity touchscreen with IPS full-view LCD screen. When the user presses a button, the touch space will play a click sound for simple operation and quick response.

Heart rate monitoring

Embedded heart rate sensor, real-time and accurate display of heart rate and calories, helping users stay in the fat burning, aerobic, or peak target zone for more effective cardio training and weight loss.

Entertainment functions

Supports installation of various Android version applications, USB interface, and WIFI wireless network support for various video online playback and picture browsing, supports MP4 format.

Weight-bearing treadmill

High-strength 25T running board, maximum static load 600KG, high-quality shock absorption design, suitable for runners of different weights and strides, ensuring safe and comfortable use for excellent fitness results.

Quick operation panel

Convenient control panel, one-key quick program switching, emergency stop and emergency brake buttons to ensure exercise safety.

Features

Dimensions:
LED: 2350*1005*1740mm/925.2*39.57*68.15 in

S-700

Commercial Treadmill

The entire machine is crafted from high-strength steel, featuring a stable structure and excellent wear resistance. Stainless steel trim strips add a touch of understated luxury. The ergonomic treadmill is calibrated with professional sports data to meet the needs of high-intensity training. The multi-dimensional shock-absorbing suspension can effectively reduce training injuries. A 4K high-definition touch screen is embedded in the body, combining a sense of technology with an elegant style.

Touch Screen

LED Screen

The user manual

The 21.5-inch LED screen /TFT screen has a screen-to-body ratio of up to 85%. The operation interface is simple and intuitive, which can be perfectly integrated into professional scenarios such as gyms and high-end personal training studios, achieving a dual breakthrough in appearance and scene adaptability.

Intelligent control and precision

Equipped with the new generation of intelligent sports chips, it supports full-dimensional electronic monitoring of sports configuration parameters and sports amplitude and frequency, with a data acquisition accuracy of up to 99.8%. It comes with multiple preset exercise programs, covering various scenarios such as fat loss, muscle building, and interval training, and also supports custom exercise mode adjustment.

Ergonomic knee pads

Deeply researching human movement mechanics, it innovatively adopts a multi-dimensional shock-absorbing suspension system. The bottom layer of the treadmill is equipped with high-density silent buffer pads, which can effectively absorb more than 60% of the movement impact force and significantly reduce the damage to knees and ankles during running. The running belt is made of diamond-patterned anti-slip and wear-resistant material, which has strong grip and is not easy to deform.

Powerful mute

Equipped with a silent variable-frequency motor, it features strong power and low operating noise. With a precise transmission structure, it operates stably without vibration. It is equipped with multiple safety mechanisms such as overheat protection and overload protection, balancing strong performance and long-term durability.

Detail texture

The hidden wiring design bids farewell to clutter. The armrest offers a comfortable grip, combined with a matte scratch-resistant panel and an integrated seamless connection process. The lines are smooth and neat, and the corners are all rounded and blunted, fully demonstrating a high-end texture.

Features

Dimensions: 2170*970*1670mm
Running Belt: 1575*600mm

JW-860

Commercial Stair Climber

JW SPORT, A Strong Companion for Your Success.

CHARACTERISTICS OF THE EQUIPMENT

Packaging Dimensions	1455*920*1270(L*W*H)
Product Dimensions	1580*845*2115(L*W*H)
Equipment Weight	203KG
Maximum Usable Weight	160KG
Heart Rate Range	40-180
Mileage Range	0-99.99
Operating Speed	0.3 to 2 kilometers per hour
Power Supply	External power supply: AC220V or AC110V
Self-adjusting Switch	Output: 6.5A, DC 24V
Electronic Reading	Time, number of steps, body fat percentage, power, heart rate, speed

LED

ANTI-SLIP FOOT PEDAL

SC-001

Stair climber

Premium commercial climbing trainer with ergonomic track and adjustable smooth resistance. Reinforced steel frame ensures stable, quiet operation. Real-time heart rate monitoring delivers effective mountain-climbing style workout for shaping and fat loss, ideal for professional fitness spaces.

SC-001

Stair climber

Touch Screen

LED Screen

Function Parameters

User Interface	Equipped with humanized intelligent operation interface, clear buttons, real-time display of time, calories, steps and easy operation.
Resistance System	Multi-level adjustable resistance with smooth and steady output without jitter.
Plate Supporting Structure	Thickened steel frame with high rigidity and deformation resistance, stable for heavy load and frequent use.
Heart Rate Monitoring	High-sensitive hand grip sensor tracks heart rate in real time for safe and effective aerobic training.
Kinesiology	Pedal angle and stroke optimized by kinesiology to fit natural climbing and reduce knee & ankle strain.
Super Luxury	Fine frame, thick anti-slip grips & wide pedals, ideal for premium gyms.
Riding up a slope	Mimics mountain climbing, superior fat loss & leg-glute shaping to regular steppers.
Strengthened Support	Multi-reinforced base, columns and pedal supports, low vibration & noise, durable for long-term heavy use.

Basic Information

Unit Dimensions	1590*850*2220mm (L*W*H)
Workout Level	0-15
Resistance Range	Ribbed Belt
Languages	Chinese and English
Power Source	External power supply:AC 220V±10%
Maximum Load	150kg
Unit Weight	None

M-9908EL

Elliptical

Touch Screen

LCD Screen

Function Parameters

User Interface	Extra-large high-precision screen is adopted to display resistance, speed, time and other readouts at all times and help you to monitor your workout status in real time.
Resistance System	Advanced ECB magnetic control resistance system are safer and more reliable.
Plate Supporting Structure	Aluminium alloy sliding rail, large diameter crown type bearing, and 8mm thickness high-strength steel plates.
Heart Rate Monitoring	Contact heart rate monitoring enables the user to measure heart rate at any time.
Kinesiology	International advanced technology makes movement trajectory completely conform with body structure and kinesiology principle.
Super Luxury	Super luxurious PU foam handlebar and environment-friendly TPR keys.
Unique Ramp Design	Unique ramp design; function of stair climber included.
Strengthened Support	3mm thickness strengthened steel tube supports console; which immensely enhances exercise stability and safety of supporting structure.

Basic Information

Display type	LED (default) /11.6" TFT (optional)
Unit Dimensions	2300*790*1810mm (L*W*H) 90.5*31.1*71.2in
Resistance Range	0-15
Languages	English
Maximum Load	150kg/330lbs
Unit Weight	166 KG/365.2lbs
Incline range	0-15

M-5812

Indoor Bike

Handlebar and seat design which complies with the principle of human engineering and gearshift resistance adjustment enables users to get comfortable. Riding experience; frictionless Magnetic control mode prolongs the service life of the braking system.

JW SPORT, A Strong Companion for Your Success.

M-5812

Indoor Bike

Function Parameters

Fore/aft adjustment of seat and free regulation of handlebar makes the ergonomically designed unit suitable for different users.

Adjustable pedals bring comfort during workouts.

The overall design of heavy flywheel and low center of gravity provides the user the feeling of better stability

High-strength pedals ensure workout safety.

The belt drive style brings dual-direction spinning and free options; transport wheels on base tubes make transportation easier and safer.

Gearshift resistance adjustment brings similar user experience as by a real road bicycle.

Frictionless magnetic control mode prolongs the service life of braking system.

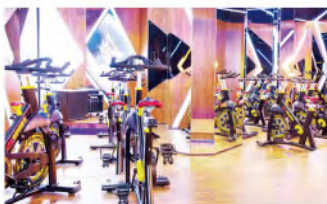

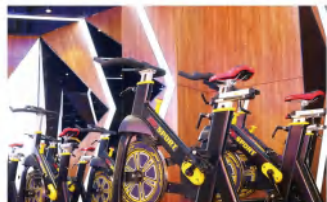

Basic Information

Unit Weight	88KG/193.6lbs
Maximum Load	150KG/330lbs
Unit Dimensions	1660*700*1445mm/65.4*27.5*56.9 in

M-5816

Indoor Bike

It redefines group cycling. The striking style, handlebar and seat design which complies with the principle of human engineering and gearshift resistance adjustment enable various users to get comfortable riding experience. Special shield design prevents flywheel from abrasion; aluminium alloy handlebar brings smooth adjustment and prevents rusting.

M-5816

Indoor Bike

Function Parameters

Fore/aft adjustment of seat and free regulation of handlebar make the ergonomically designed unit suitable for different users; water bottle holder is equipped; adjustable pedals bring comfort during workouts.

Thickened central shaft and high-strength pedals ensure workout safety.

The belt drive style brings dual-direction spinning and free options; transport wheels on base tubes make transportation easier and safer.

All-steel structure and press style design prolong service life of the braking system.

Special shield design prevents flywheel from abrasion; aluminium alloy handlebar brings smooth adjustment and prevents rusting. Streamlined design brings a more elegant look.

Basic Information

Unit Weight	75KG
Unit Dimensions	1250*530*1150mm (L*W*H)

M-8808R

Recumbent Bike

Sturdy design and intuitive console make it easy and convenient to use. Fashionable look and good durability enable it to be an asset suitable for any fitness center. It can be connected to Wi-Fi and operated through service management, and provide data and recommendations on preventive maintenance

M-8808R

Recumbent Bike

Function Parameters	
User Interface	18.5" extra large touch screen, interface similar as smart phone; different pages for functions can be selected with taps on screen; more intuitive operation, quick response.
Entertainment Feature	Music, videos and pictures are available by inserting U disk or memory card; built-in analog&digital TV allows you to watch favourable programmes while having exercise.
Keyboard Shortcuts	Resistance, speed, quick start.
Heart Rate Monitoring	Digital heart rate monitoring system with contact heart rate sensor chip equipped measures your heart rate precisely. Remote (optional wireless chest strap required) heart rate monitoring system provides precise measurement and frees your hands.
Workout Modes	Intelligent resistance adjustment; 20 levels.

Basic Information	
Heart Rate Monitoring	contact and remote (optional wireless chest strap required) heart rate monitoring
Resistance Range	0-20
Maximum Load	150KG/330lbs
Power Source	External power supply; AC 220V±10% (50Hz/60Hz)
Unit Dimensions	(L*W*H)1920*610*1630mm/75.6*24.0*64.2in
Unit Weight	94 KG/206.8lbs
Readouts	Time, Distance, Calories, Power, Heart rate, Speed.

M-8808U

Upright Bike

Ergonomical design; adjustable seat. Improved durability and comfort. It can be connected to Wi-Fi and connected to back office for better maintenance and service.

M-8808U

Readouts	Time, Distance, Calories, Power, Heart rate, Speed.
Handlebar	high-density foam handlebar feels soft and comfortable during workouts.

CS-SERIES

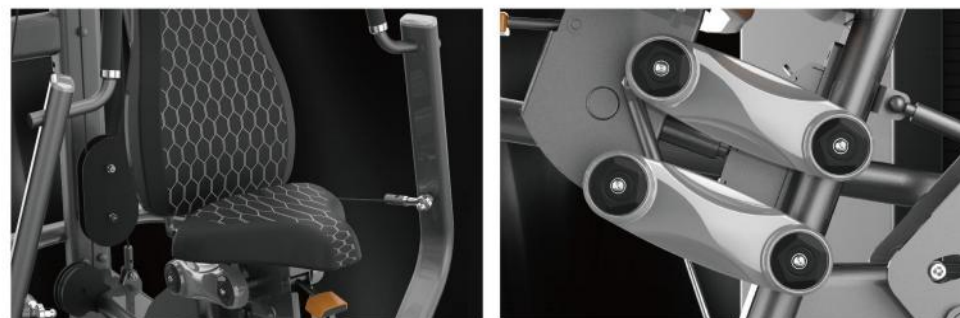

Climbs

The Climbs series features a robust and steady design with smooth lines, providing a unique and recognizable appearance. Utilizing cutting-edge international exercise technology, it ensures a more scientific movement pattern. The core components are all benchmarked against European industrial standards, delivering smooth, even power output.

Climbs

JW's brand-new fixed force equipment is imposing and heavy, with a strong visual impact. European industrial-grade precision accessories, integrated with the cutting-edge design concepts of sports science, become the finishing touch of the fitness space with an all-round surpassing work.

Max load weight: 100KG
Dimensions: 1770*810*1600mm(L*W*H)

JW-SERIES

Strength Equipment

The JW Power series guard plate adopts a large area of semi-transparent frosted texture material, bidding farewell to the monotony of traditional equipment's cast iron in terms of touch, and presenting a reserved and luxurious visual effect. The entire design is filled with the most expensive regal air.

Chest Press

JW-001

Size (L*W*H) : 1360*1550*1800mm/53.15*58.07*69.68in
Net weight: 248(kg)

Pec Fly

JW-002

Size (L*W*H) : 1250*1675*1555mm/49.21*65.94*61.22in
Net weight: 221(kg)

Pec Fly

JW-002A

Size (L*W*H) : 1370*1450*2060mm/53.94*57.09*81.10in

Super Racing Frame

EQUIPMENT CHARACTERISTICS

Product size (minimum)	1935*2030*1330(L*W*H)
Product size (maximum)	1935*2030*1985(L*W*H)
Main frame	It is composed of 80mm*80mm*T3.0 square tubes, with a streamlined appearance design that is simple and fashionable.
Backrest	Designed based on ergonomic principles, it ensures a moderate hardness and softness, suitable for the vast majority of users. The outer layer is covered with leather, which can be rubbed back and forth 8,000 times with a 500g weight without peeling or fading. The standard leather color options include carmine red, graphite black, etc., which are optional.
Handle	Made of $\phi 30\text{mm}$ 304 stainless steel pipe (knurled process)
Regulating device	Multi-speed adjustment, suitable for all kinds of people.

The porous position adjustment is extremely sturdy

High-quality leather with a premium texture
